■ Holland Safety Coating B.V.®

A company providing industrial services in visibility, safety and durability and the production of other chemical products. Improving (road)safety by the application of sustainable and energy-neutral products is a core-task of HSC. Innovation in products and application in a socially responsible manner is a continuous process within the company. Our products and services can be used by municipalities, provinces and companies.

■ HSC GlowingLines®

Luminescent lining for both indoors as well as outdoors usage is a service provided by HSC by the name of HSC GlowingLines, a registered trademark of HSC. This is an innovative way of marking roads, paths, both bicycle and parking lanes, as well as safety lines in construction and industry. The luminescent lining is available in white, yellow, blue, green and red and feature an anti-slip coating in accordance with the applicable standards. The combination of HSC GlowingLines with 'dynamic lighting', a feature in which the luminous lining is being charged by completely autonomous operational light posts equipped with UV-features is revolutionary. By operating through solar panels, this system is capable of working completely off-the-grid. This system has multiple advantages, which include even better visibility and a solution to long, dark winter nights.

■ Joint venture

Holland Safety Coating B.V. shares her expertise with SPL Coatings and HSC Safetycoatings. SPL Coatings provides the complete product for luminescent lining. HSC Safetycoatings develops and improves new features in the field of safety. HSC manufactures and delivers chemical products for companies. This includes the luminescent-coated glass beads Luminorpearls, a registered trademark of HSC, for SPL Coatings Luminescent Roadmarking. The latest innovation from HSC is the HSC Nightviewbeads. This product is the latest generation luminescent-coated glass, in which the glass beads are no longer coated, but entirely provided with the latest generation luminescent pigments. This new innovation will replace the current Luminorpearls within the assortment of HSC and will also be applied in the latest generation luminescent roadmarking. Holland Safety Coating B.V. has teamed up with Next Generation B.V.. Next Generation is the ideal business partner and unique sparring partner. At this moment, we are working hard on new innovations in the field of roadmarking, lining and safety.

■ Revolutionair

The ideas, the concepts, the products, the prices... all are worthy of being called revolutionary. .
